

Castle

The castle is a structure with different levels and several slides. The stairs lead to a higher level where the towers, some with water spouting cannons, some with slides are accessible. The inner area can be used for seats and tables or some extra water attractions.

The castle can be designed in various shapes and sizes, according to your wishes. There are several options available to expand/customize the castle.

For example:

- Different slides
- Water cannons
- Flags
- Different water effects
